

My Mixed Media Metal Art

The term “**mixed media art**” is a broad definition that covers many arts and crafts, including collage, assemblage, altered objects, including books and boxes, handmade greeting cards, artist trading cards, tags, art journaling and book making.

The “mixed media” used includes paints, papers and board of all descriptions, glues, buttons, fabrics, found objects, photos, metal bits, fibers, organic materials, inks, pencils, crayons, markers, pastels and polymer clays, to name a few..

Having just started to dabble with mixed media I have already decided that that the main “mix” in my “media” will always be my first love, metal...here are some of my “dabblings...”
